

# Recycling In Your Offices

Commingled Recycling will help bring UCI's diversion rate closer to our goal of 95% by 2020. With a quick rinse and dry many more materials can be diverted from landfills, therefore contributing to a cleaner environment.

Commingled recycling allows for more recyclable materials to be collected than in a regular mixed-paper recycling bin. Paper, plastic, glass and metal materials can now be recycled in these bins if **CLEAN & DRY**.

Larger recycling and landfill bin-sets are currently in use in over 160 main lecture halls on campus and are available for purchase from Facilities Management for use in communal office areas, such as conference rooms and kitchens.
