

# TEXT TO CONSERVE

A large amount of water waste per year is caused by leaks and dripping faucets.

At one drip per second, a faucet can leak upwards of 3,000 gallons of water per year!

WATER@UCI.EDU

We encourage faculty, staff and students to report any water conservation concerns they may have.

Report any plumbing drips, leaks, excessive flushing, and failed equipment to the Facilities Management Service Desk at (949) 824-5444

Whenever you witness a water problem, you can text [water@uci.edu](mailto:water@uci.edu) and report the location of:

- broken sprinklers
- over-watered issues
- and even under-watered areas on campus

Feel free to send us photos too!
