Dear Campus Customers,

Central Plant will be conducting a regularly scheduled high temperature hot water shutdown the weekend of Friday, June 21, 2019 through Sunday, June 23, 2019.

We will be shutting down after 5:00p.m. on Friday, June 21, 2019. Normal service will be restored no later than Sunday, June 23, 2019 at 11:00 p.m.

The purpose of this shutdown is to conduct regularly scheduled maintenance of equipment on the high temperature hot water system and the cogeneration plant. The systems that will be affected during the shutdown will include: building heat, industrial & domestic hot water, and steam generation for cage washers and autoclaves.

The campus power and chilled water supply for the buildings and process cooling will not be affected during this shutdown.

This maintenance will help ensure that we provide reliable service to the campus community.

Buildings NOT affected by the Central Plant HTHW Shutdown:
AIIRB
Beckman Laser
Berkeley Place / Law School
EH&S
Gavin Eye Institute
Gillespie
Gottschalk
Gross Hall
Hewitt
Hitachi
Housing
